

Jacques Malan Potgieter

Software Developer

Personal Information:

Cell: +27 71 403 7786
Email: jacquesmalanpotgieter@gmail.com
Location: Lichtenburg, North-west, South Africa
Driver's License: Code B
Languages: Afrikaans, English
ID: 84 02 26 5009 084

HEADLINE:

Software Developer with experience in full-stack development and supporting client-focused web projects. At TFM (Travel Find Me), I've been involved in the delivery of web-based solutions, assisting with requirements gathering, sprint tasks, and the rollout of travel platforms across multiple brands.

I work mainly within the MEAN stack and contribute to day-to-day project coordination, technical implementation, and client communication. My role has included collaborating with design, content, and development teams, helping keep tasks on track, assist in resolving technical issues, and supporting timely delivery of projects.

With a practical, hands-on approach and a strong problem-solving mindset, I enjoy working in structured environments where planning and execution go hand in hand. My goal is to continue growing as a developer and move into a senior role, focusing on technical excellence, maintainable code, and supporting team delivery through experience and consistency.

SOFTWARE DEVELOPER – tfm (Travel Find Me) | Cape Town | South Africa (Sep 2023 – Current)

Key Functions & Responsibilities:

- Liaised directly with clients to understand frontend feature requirements and deliver tailored, user-friendly web interfaces.
- Developed and maintained web applications using Angular, HTML, SCSS, JavaScript, and integrated backend technologies like Node.js, MongoDB, and MySQL to support dynamic content and robust data handling.
- Led the end-to-end feature development cycle - from scoping and planning to coding, testing, and deployment - ensuring timely and efficient delivery of solutions.
- Applied responsive design principles to ensure mobile-first, cross-platform compatibility.
- Played a pivotal role in modernizing legacy systems by migrating outdated websites and reworking obsolete codebases for current standards and SEO.
- Built dynamic travel-related UI components, including map integrations, custom travel cards, special offers sliders, and booking selectors, to improve UX and boost conversions.
- Managed client-specific Angular builds using a dynamic configuration system based on unique client IDs, supporting multiple branded websites from a shared codebase.
- Utilized Git and GitHub for collaborative version control and code reviews, facilitating smooth teamwork and reliable release cycles.

Jacques Malan Potgieter

Software Developer

- Implemented project tracking workflows and liaised with clients and stakeholders to prioritize features, allocate resources, and manage scope creep.
- Worked closely with the design and content teams to ensure branding consistency across marketing pages and custom landing pages (e.g., Black Friday and cruise promotions).
- Oversaw project timelines, feature prioritization, and task allocation for multi-brand Angular applications across multiple client websites.
- Acted as technical liaison between clients, design teams, and developers to ensure scope alignment, timely delivery, and stakeholder satisfaction.
- Managed sprint planning and progress tracking using Agile tools, facilitating daily standups and retrospectives.
- Balanced technical implementation with project goals, proactively resolving blockers and adapting to changing client requirements.

PRINTER TECHNICIAN – Daisy Business Solution | De Aar | South Africa (Jan 2022 – Sep 2023)

Key Functions & Responsibilities:

- Provide remote and in-person assistance to consumers to identify and fix printer issues.
- Present and show each piece of equipment to customers, employees, and others in a professional manner.
- Install, demonstrate, train, and present all technical equipment to clients in a professional manner, including printing, maintenance, and special applications.
- As necessary, rebuild, upgrade, and maintain all technical apparatus.
- Share prospective sales prospects.
- Able to diagnose and repair electrical and mechanical malfunctions to bring all technical equipment back up to operational standards.
- Understand the application of all chemicals and inks for purposes of functional use in all machines.
- Perform detailed mechanical, electrical and maintenance service at customer sites.
- Setup and connect printers to small office environment.
- Troubleshoot network problems, recommend changes and or upgrades.
- Complete all service reports and provide this information back to regional manager.

JUNIOR ANGULAR WEB DEVELOPER (Junior) – tfm (Travel Find Me) | Cape Town | South Africa (Apr 2022 – Sept 2023 Internship)

Key Functions & Responsibilities:

- Getting client requests for the frontend requirements and producing them.
- Writing code using HTML, CSS, JavaScript, and other programming languages including backend like MongoDB and MySQL, as needed to create web pages according to clients' specifications.
- Modify the code using the Angular framework to meet specific needs.
- Working collaboratively using GitHub and GIT.
- Transferring data from outdated websites to new, improved websites.
- Transforming XML, XSL data for specific output templates for clients.

Jacques Malan Potgieter

Software Developer

SITE SUPERVISOR – HeroTel – Border Internet | East London | South Africa (Feb 2021 – Nov 2021)

Key Functions & Responsibilities:

- Manage civil workforce on site and work on fibre implementation projects, the HeroTel standard. Monitor, control, organise, plan, and install all civil aspects including the planting of poles, opening of trenches, duct installation, re-instatement of roads and verges.
- To ensure the build lines are according to site specifications, provided by Project Manager, and fibre is done according to plan. To communicate the planned works to staff under my control. And record proof of correct installations by taking photos. Pro-actively identify and solve problems.
- Managing escalations from Projects and Field Operations to national office.
- Ensure that all team members comply with health and safety regulations and that best practices are followed and ensure that all team members are issued with and use correct personal protective equipment (PPE).
- Communicate any employee issues to Project Manager and H&S representative.
- Inter Department link between site field operations and other stakeholders, as well as clients. (Flow control)
- Ensure that daily attendance registers are filled out and communicated.
- Manage the daily activities of all resources making sure that the agreed daily targets, deliverables, milestones, and deadlines are met by each person working on the site.
- Manage 3rd party contractors work on the fibre implementation project, which include but are not limited to local municipality and civil contractors.
- Administration and preparation of reports as required by the Project Manager.
- Responsible for all daily day to day procurement of any site requirements. Ensure stock levels are adequate and maintain accurate report. (Inventory management)
- Ensure that all project assets including trenching equipment are clean and used correctly. (Asset management)
- To follow and carry out any specific duties as directed by the Project Manager. To enhance long term client relationships via effective image building and client relation.
- Ensuring that standard processes and procedures are being met across all departments, nationwide.

PROJECT MANAGER – BlackFox Products | Randburg | South Africa (Sep 2020 – Dec 2020) (Short term contract)

Key Functions & Responsibilities:

- Project manager for BlackFox Products, leading a roll out for Nedbank, upgrading the Self-Service Kiosk in the branch.
- Responsible for efficient project roll out, nation.
- Liaise with Nedbank Project Managers about scheduling and report as kiosk are completed.

PROJECT MANAGER – Crest Information Systems | Sandton | South Africa (Mar 2017 – May 2020)

Key Functions & Responsibilities:

- Oversee and lead some of the company's largest projects (information available upon request).

Jacques Malan Potgieter

Software Developer

- Responsibilities include, receive, and read preliminary mechanical drawings for new projects, preparing project plans, budget estimation and scheduling.
- Mechanical draughting of products on Solid Edge and AutoCAD.
- Project Management administrative duties. (Project scheduling, monitor and control, quality assurance and quality checks)
- Provide technical assistants to financial manager, this included functions such as basic accounting and completing production recons. Technical liaison between stakeholder and manufacturing.
- Attend project meetings and distribute minutes to relevant team members. (Kick off and During Project Phases)
- Capturing, filing, and tracking of purchase orders and mechanical drawings.
- Assisting procurement office with purchasing of non-standard tooling and material.
- Review client specifications and advise of any extraordinary requirements that can significantly impact the project. (Deadline, budget, stakeholders & project members).
- Review mechanical drawings. (Assist with preparation, compile bill of materials & insuring drawings is current and correct).
- Complete costing and estimating of new projects.
- Recommend changes in procedures to improve operating efficiency of factory.
- Planning of project requirements. (In housework and outsourced work).
- Assist drawing office manager regarding design monitoring, development, and feedback.
- Oversee and assist sales department with special projects and technical requirements (Certain Projects must adhere to ISO standards).
- Develop, implement and improve quality systems to check products delivered to customers. Manage other aspects of warehouse as well. (Transport and staff)
- Site management.
- Assist dispatch department with relevant quality checks and supply chain documentation.
- Reason for leaving – Retrenchment.

TECHNICAL SALES AND DRAUGHTSMAN – Crest Information Systems | Sandton | South Africa (Apr 2015 – Mar 2017)

Key Functions & Responsibilities:

- Responsibilities included completing costings and estimations on new and current projects.
- Technical Assistant to financial manager. (Manufacturing costs)
- ERP implementations provide training and support.
- Production reconciliations. (Projects cost as well as production improvements)
- Maintaining and improving relationships with the client.
- Travelling to clients.
- Sourcing new clients.
- Quotations.
- Meeting sales targets of the organization through effective planning and budgeting.
- Maintain necessary data and records for future reference.

Jacques Malan Potgieter

Software Developer

- Follow up on orders.
- Ensure customer records are maintained.
- Ensure a good working relationship is maintained with both management and all staff and clients.
- Pricing of products.
- Data capturing.
- Attend to and resolve customer complaints.
- Reason for leaving: Promotion.

CNC PROGRAMMER – Crest Information Systems | Sandton | South Africa (Jan 2010 – Apr 2015)

Key Functions & Responsibilities:

- CNC Programming of Amada Laser and Punching Machines. (Sheet metal part from mechanical designs)
- Mechanical drawing Maintenance. (Sheet Metal Field)
- Improve procedures and operating efficiency of cutting department.
- Issue and analyse job cards and file when done.
- Update any changes from design department to programming department.
- Review CAD models and prepare parts for programming.
- Make calculations to determine where materials should be cut.
- Define the best sequence of machining steps.
- Generate program code using computer-aided-manufacturing (CAM) software to capture all these decisions.
- Run simulations.
- Conduct quality testing and correct/improve program code to increase efficiency, quality and safety. (Communicate with other programmers, shop floor management, machinists/setup and operators and engineering and sales staff to achieve this)
- Set-up and operate laser with controller.
- Analyse inspection reports to determine adherence to mechanical drawings, specifications, processing procedures.
- Create and modify programs.
- Keep all programs up to date for repeat jobs.
- Factory Management. (CNC cutting department)
- Reason for leaving: Promotion.

CNC PROGRAMMER – Power Process Systems | Aeroton | South Africa (Jan 2009 – Dec 2009)

Key Functions & Responsibilities:

- CNC Programming of Laser and Punch.
- Junior Sheet Metal Designer.
- Assistant Production Planner.
- Analyse job orders.
- Generate program code using computer-aided-manufacturing (CAM) software.

Jacques Malan Potgieter

Software Developer

- Run simulation tests.
- Set-up and operate laser with controller.
- Reason for leaving: better opportunity.

JUNIOR TECHNICIAN – Paul's Gates | Kya Sands | South Africa (May 2008 – Dec 2008)

Key Functions & Responsibilities:

- Sliding gate automation installations D3/D5 and A10 Series.
- Receive blueprints and instruction in morning meetings and follow to complete installations.
- Conduct preventative maintenance on automatic gates for clients.
- Provide trouble shooting and repair for damaged or malfunctioning gates.
- Adjust gates to open or close with the correct amount of effort and make simple adjustments to electric openers.
- Apply hardware to door sections, such as drilling holes to install locks.
- Assemble and fasten tracks to structures or bucks, using impact wrenches or welding equipment.
- Bore and cut holes in flooring as required for installation, using hand tools and power tools.
- Clean gates closer parts, using caustic soda, rotary brushes, and grinding wheels.
- Cut gate stops and angle irons to fit openings.
- Fasten angle iron back-hangers to tracks, using fasteners or welding equipment.
- Remove or disassemble defective automatic mechanical gates.
- Repair or replace worn or broken parts, using hand tools.
- Installation of wired and wireless intercom systems.
- Run low voltage wiring on surfaces.
- Connect power packs and electrical panel boards
- Installation of small security gates.
- Install electrical fences.
- Drill and erect small post around perimeter, run electric wiring around perimeter and complete all electrical connections required for security fence to be operational.
- Site Inspection and control for all installations.
- Evaluate and ensure prior to commencement of work, that the appropriate tools and equipment are working and/or available.
- Reason for leaving: better opportunity presented.

OXYGEN THERAPIST – Medizone | Linden | South Africa (Feb 2008 – Apr 2008)

Key Functions & Responsibilities:

- Field Sales.
- Sales Representative.
- Travel to clients
- Cold calling

Jacques Malan Potgieter

Software Developer

- Source new client leads
- Oxygen Therapy.
- Meeting sales Targets of organisation through effective training and planning.
- Brand Promotion.
- Follow up on orders.
- Visit clients to demonstrate use of products, show samples and take orders.
- Arrange a schedule of visits to major potential buyers by contacting people and making appointments.
- Carry out formal presentations of products using videos and other training aids.
- Attend promotional markets and organise product displays.
- Reason for leaving: Temporary job.

PHOTOGRAPHIC MAPPER – Azur Aerial Work | Meyers Park | South Africa (Mar 2007 – Jan 2008)

Key Functions & Responsibilities:

- Select aerial photographic and remote sensing techniques and plotting equipment needed to meet required standards of accuracy.
- Define aerial photographic detail, such as control points, hydrography, topography, and cultural features, using precision stereo plotting apparatus or drafting instruments.
- Prepare and alter trace maps, charts, tables, detailed drawings, and three-dimensional optical models of terrain, using stereoscopic plotting and computer graphics equipment.
- Collect information about specific features of the Earth, using aerial photography and other digital remote sensing techniques.
- Compile data required for map preparation, including aerial photographs, survey notes, records, reports, and original maps.
- Revise existing maps and charts, making all necessary corrections and adjustments.
- Data capturing.
- Reason for leaving: Company closed.

JUNIOR TECHNICIAN – SNS Engineering and Construction | Silverton | South Africa (Apr 2006 – Mar 2007)

Key Functions & Responsibilities:

- General electrical maintenance for Ford Motor Company.
- Repair parts and equipment when needed.
- Electrical installations. (Build and maintain mini-substations, overhead Busbars, and robotic networks)
- Dig trenches for substations to lay down wiring.
- Connect substation.
- Determine malfunction of electrical system by visual inspection and by use of testing devices, such as oscilloscope, voltmeter, and ammeter.
- Repair or replace defective wiring in buildings and monitoring systems, and safety control systems, using electrician's hand tools.

Jacques Malan Potgieter

Software Developer

- Mechanical installation. (Assembly points, fence for parking area, tea break stations.
- Hoists, air, and water pipeline installations.
- Reason for leaving: Retrenchment.

JUNIOR HVAC AND WATERCOOLER INSTALLER – Anzul Projects | Pretoria North | South Africa (Jan 2005 – Apr 2006)

Key Functions & Responsibilities:

- Installing, maintaining and repairing heating, ventilation, air-conditioning and refrigeration systems.
- Inspect, repair, modify and install HVAC equipment including refrigeration and air conditioning compressors, receivers, condensers, chillers, water cooling towers, automatic and hand valves, expansion valves and capillary tubes.
- Conduct regular preventive maintenance inspections of isolated heating and ventilating units, including air conditioning equipment, and make necessary adjustments or repairs, service and repair evaporative coolers.
- Repair or replace defective parts in units and equipment and their controls, including thermostats, automatic switches, fan controls, log switches, relays, filters, controls, belts, compressors, heat exchangers, high limit controls, pressure controls, and safety valves.
- Lubricate and pack heating, ventilation, refrigeration, and air-conditioning motors, pumps, fans, and other equipment.
- Install copper tubing and repair pipes and tubing, as necessary.
- Test joints and insulate pipes of refrigeration and air conditioning systems.
- Diagnose and fix problems found in air conditioning systems.
- Installing air conditioning systems. (Home and office)
- Testing systems for proper functioning.
- Performing emergency repairs.
- Ensure compliance with building and safety regulations.
- Perform routine and preventive maintenance as needed to ensure ongoing functioning of HVAC systems.
- Maintain appropriate service and repair records.
- Clean system changes filters and check air quality levels.
- Reason for leaving: better opportunity presented.

Summary of Professional Skills:

Technical & Development Skills:

- Front-End Web Development (Angular, HTML5, CSS3, TypeScript, JavaScript)
- RESTful API Integration & System Implementation
- Git Version Control & CI/CD Practices
- Responsive Design & Cross-Browser Compatibility
- Debugging, Testing & Performance Optimization

Jacques Malan Potgieter

Software Developer

Project & Product Management:

- Agile & Scrum Methodologies (Sprint Planning, Retrospectives)
- Project Scoping, Planning & Execution
- Requirement Gathering & Documentation
- Stakeholder Communication & Progress Reporting
- Task Coordination, Timeline Management & Risk Mitigation

Communication & Collaboration:

- Client Relationship Management & Technical Sales Support
- Clear Written & Verbal Communication
- Team Leadership & Cross-Functional Collaboration
- Conflict Resolution & Change Management

Operational & Analytical Skills:

- Process Improvement & Quality Assurance
- Production & Resource Planning
- Procurement & Vendor Liaison
- Data Analysis & Insight-Driven Decision Making

Additional Strengths:

- Strategic Thinking & Problem Solving
- Industry Training & Mentorship
- Customer-Focused Development
- Time Management in Fast-Paced Environments

Personal Attributes:

I am an analytical and solutions-oriented professional with a strong ability to manage multiple tasks while remaining focused and adaptable. Known for being proactive, self-driven, and quick to learn, I bring energy and confidence to every project. I thrive in collaborative environments, effectively managing relationships and navigating conflict with clarity and diplomacy. My persuasive communication style, coupled with a diligent and goal-focused mindset, allows me to motivate others and contribute meaningfully to team success.

Formal Education:

Completed Studies:

Project management Foundation Certificate – University of Cape Town | Cape Town | 2015

Subjects: Introduction to Project management, Initiation and Identifying Stakeholders, Risk Management, Work Breakdown Structures, Realistic Scheduling and Accurate Estimation, Understanding Cost, Scheduling and Quality,

Jacques Malan Potgieter

Software Developer

Selecting a project team, Clear Communication between Stakeholders, Measuring Progress and Solving Common Project Problems, Advancing your Practice of Project Management.

National Certificate Mechanical Engineering (N4) – Academic Institute of Excellence | Midrand | 2018

Subjects: Mechanotechnics, Mathematics, Science, Supervisory Management.

Advance Excel – Udemy | Online | 2018

Advance Formulas & Functions. Data analysis with Pivot tables.

Fibre fundamentals and advance courses – Herotel Academy | Online | 2020

Technical training on fibre, how it works and how to implement. (Underground as well as aerial)

Senior Certificate – Frikkie Meyer | Thabazimbi | 2002

Completed high school with university admission. I served as a prefect in my matric year.

Current Studies:

Web and Software Development.

Computer and Software Knowledge:

Productivity & Collaboration Tools:

- Microsoft Word, Excel (Advanced), Outlook, PowerPoint, Teams

Web & Programming Languages:

- HTML, CSS, JavaScript, Python, Node.js

Development Tools & Platforms:

- Git, GitHub, Visual Studio Code, WordPress

Design & CAD Software:

- AutoCAD (2012+), Solid Edge (v14+)

ERP & Business Systems:

- Mie Trak (SAP Environment), Pastel Accounting
